

Appl. No. 09/966,696

Please amend Claim 13 as follows:

13. (Amended) A container-item holder for a gaming device including a cabinet and a support connected to the cabinet, said container-item holder comprising:

a container holding portion adapted to be mounted to the support, said container holding portion including a base and a body extending from the base, wherein said base and body define a chamber for receiving and holding a container, and wherein the base defines at least one opening to enable fluid to drain from the chamber; and

an item holding portion connected to the container holding portion.

Please cancel Claim 15 without prejudice or disclaimer.

Please cancel Claim 16 without prejudice or disclaimer.

Please amend Claim 17 as follows:

17. (Amended) The container-item holder of Claim 13, wherein the body includes a flange which has a circumference greater than a circumference of a channel in the support adapted to receive the body.

Please amend Claim 22 as follows:

22. (Amended) A gaming device comprising:
a cabinet; and

Appl. No. 09/966,696

a support connected to the cabinet which defines at least one channel within the support which is adapted to receive a container-item holder, wherein said container-item holder includes a container holder and at least one item holder connected from the container holder.

Appl. No. 09/966,696

Please add New Claim 26 as follows:

26. (Newly Added) A gaming device comprising:
a cabinet;
a support connected to the cabinet; and
a container-item holder connected to the support, said container-item holder including a container holder and an item holder connected to the container holder, wherein the container holder includes a base and a body connected to the base, said base defining at least one opening which enables fluid to drain through the base.

Please add New Claim 27 as follows:

27. (Newly Added) The gaming device of Claim 26, wherein the support includes a bolster.

Please add New Claim 28 as follows:

28. (Newly Added) The gaming device of Claim 27, wherein the bolster includes a substantially vertically extending channel adapted to receive the container-item holder.

Please add New Claim 29 as follows:

29. (Newly Added) The gaming device of Claim 26, wherein the item holder is rotatably connected to the container holder.

Appl. No. 09/966,696

Please add New Claim 30 as follows:

30. (Newly Added) The gaming device of Claim 26, wherein the container holder includes a body and a flange connected to the body, wherein the flange has a circumference greater than a circumference of a channel in the support adapted to receive the container holder.

Please add New Claim 31 as follows:

31. (Newly Added) The gaming device of Claim 26, wherein the item holder includes a hook.

Please add New Claim 32 as follows:

32. (Newly Added) The gaming device of Claim 26, wherein the item holder includes a connecting portion connected to the base and a securing portion connected to the connecting portion.

Please add New Claim 33 as follows:

33. (Newly Added) The gaming device of Claim 33, wherein the connecting portion is rotatably connected to the base.

Please add New Claim 34 as follows:

34. (Newly Added) The gaming device of Claim 26, wherein the item holder includes a connecting portion and a securing portion connected to the connecting portion.

Appl. No. 09/966,696

Please add New Claim 35 as follows:

35. (Newly Added) The gaming device of Claim 35, wherein the securing portion includes means for inhibiting an item from being easily removed from the item holder.

Please add New Claim 36 as follows:

36. (Newly Added) A container-item holder for a gaming device including a cabinet and a support connected to the cabinet, said container-item holder comprising:

a container holding portion adapted to be mounted to the support, said container holding portion including a base, a body extending from the base, wherein said base and body define a chamber for receiving and holding a container, and wherein the body includes a flange which has a circumference greater than a circumference of a channel in the support adapted to receive the body; and

an item holding portion connected to the container holding portion.

Please add New Claim 37 as follows:

37. (Newly Added) The container-item holder of Claim 36, wherein the item holding portion is rotatably connected to the container holding portion.

Please add New Claim 38 as follows:

38. (Newly Added) The container-item holder of Claim 36, wherein the base defines at least one opening which enables fluid to drain from the chamber.

Appl. No. 09/966,696

Please add New Claim 39 as follows:

39. (Newly Added) The container-item holder of Claim 36, wherein the item holding portion includes a connecting member connected to the container holding portion and a securing member connected to the connecting member.

Please add New Claim 40 as follows:

40. (Newly Added) The container-item holder of Claim 39, wherein the connecting member is rotatably connected to the container holding member.

Please add New Claim 41 as follows:

41. (Newly Added) A gaming device comprising:

a cabinet;

a support connected to the cabinet; and

a container-item holder connected to the support, said container-item holder including a container holder and an item holder connected to the container holder, wherein the container holder includes a body and a flange connected to the body, and wherein the flange has a circumference greater than a circumference of a channel in the support adapted to receive the container holder.
